Shahriar Bin Elias

Automation Engineer And Full Stack Web Developer

I have a certificate from Georgia Institute of Technology in Full Stack Web Development | Coding where I honed my skills in JavaScript, CSS, and HTML while also successfully creating 6 full stack web application from scratch to deployment. Prior to receiving my certificate, I worked as a QA analyst with Infosys Ltd., working for an array of clients; notably for Macy's, GSK, and Conduent where I developed automation frameworks from scratch to evaluate existing functions to make sure there is proper functionality when a new feature is added.

My goal is to learn, develop and progress to a Senior Web Developer within an organization applying my newly honed skills as well as my attention to detail and ability to solve complex problems while creating visually appealing websites that are functional and effective. I believe my eagerness and ability to organize employing excellent time management skills, and quick to adapt in an agile team structure and my enthusiasm will be a great value to your company.

Work History

2017-06 - Current

Sr. Automation Engineer
Infosys Limited, Atlanta, GA
